

11-9-2007

From the Lord Melchizedek and the Ascension Councils at the Center of the God's Eye Helix Nebula:

Follow this link for a stunning 40 second video of this Nebula:

<http://hubblesite.org/newscenter/archive/releases/2004/32/video/a/>

We welcome you from the Center of the God's Eye Helix Nebula on this day of 11-9. This is a 9-11 call for Lightworkers to Unify their hearts in the center of the Heart of Gaia to assist in the transmutation of gamma ray bursts emanating from a nearby star system. We make this call for assistance from those of you working for the Ascension, after great deliberation, because we know that you are able to choose Love and to assist those assisting you, to decrease the fear vibration around these events. This allows you to assist in the transmutation of a *potential reality* of gamma ray disruption of the Earth Ascension Process. This means, that through your creation ability as Lightworkers, you will facilitate a *probable reality of shift* into a more orderly process of transition and change.

We ask you to center in your hearts and to know that the Universal Law of Accelerating Returns is part of this shift. Also know that the Law of Confluence takes this acceleration into account and creates the transmutation properties of "Ask in Love and you Shall Receive". Thus, we ask you to Ask for the transmutation of the gamma ray bursts into Living, Loving Light. We are calling on the Exponential Power of Love to heal all things.

The Law of Accelerating Returns

by [Ray Kurzweil](#)

An analysis of the history of technology shows that technological change is exponential, contrary to the common-sense "intuitive linear" view. So we won't experience 100 years of progress in the 21st century -- it will be more like 20,000 years of progress (at today's rate). The "returns," such as chip speed and cost-effectiveness, also increase exponentially. There's even exponential growth in the rate of exponential growth. Within a few decades, machine intelligence will surpass human intelligence, leading to The Singularity -- technological change so rapid and profound it represents a rupture in the fabric of human history. The implications include the merger of biological and nonbiological intelligence, immortal software-based humans, and ultra-high levels of intelligence that expand outward in the universe at the speed of light.

Gamma Ray Bursts: (from Wikipedia.com)

Gamma-ray bursts (GRBs) are the most [luminous](#) events occurring in the [universe](#) since the [Big Bang](#). They are flashes of [gamma rays](#) emanating from seemingly random places in deep space at random times. The duration of GRBs usually ranges between a few milliseconds to minutes, often followed by an afterglow emission at longer wavelengths ([X-ray](#), [ultra violet](#), [optical](#), [infrared](#), and [radio](#)).

http://www.ottawa.rasc.ca/astronotes/2006/09_sep/index.html

Excerpt:

Rivaling energy levels of the Big Bang, gamma ray bursts are the most luminous (and powerful) point sources in the observable universe.

This type of star is called a "hypernova." It is a rare type of a supercharged super-nova from an extremely massive star that undergoes core collapse. These gargantuan stars are at least 100 solar masses are situated at cosmological distances.

A blast-wave of material is produced inside a collapsing star, also called a "collapsar." A black hole forms inside the star before it detonates. The material plows through the star and heats the internal layers to millions of degrees. The ensuing heat and energy create the gamma-rays.

A nearby gamma ray burst could possibly cause [mass extinctions](#) on Earth. Though the short duration of a gamma ray burst would limit the immediate damage to life, a nearby burst might alter [atmospheric chemistry](#) by reducing the [ozone layer](#) and generating acidic [nitrogen oxides](#). These atmospheric changes could ultimately cause severe damage to the [biosphere](#).

An Excerpt from the International Journal of Astro-Biology of the Cambridge University Press: (2004)

<http://journals.cambridge.org/action/displayAbstract?fromPage=online&aid=240775>

Gamma-ray bursts (GRBs) produce a flux of radiation detectable across the observable Universe. A GRB within our own galaxy could do considerable damage to the Earth's biosphere; rate estimates suggest that a dangerously near GRB should occur on average two or more times per billion years. At least five times in the history of life, the Earth has experienced mass extinctions that eliminated a large percentage of the biota. Many possible causes have been documented, and GRBs may also have contributed. The late Ordovician mass extinction approximately 440 million years ago may be at least partly the result of a GRB. A special feature of GRBs in terms of terrestrial effects is a nearly impulsive energy input of the order of 10 s. Due to expected severe depletion of the ozone layer, intense solar ultraviolet radiation would result from a nearby GRB, and some of the patterns of extinction and survivorship at this time may be attributable to elevated levels of UV radiation reaching the Earth. In addition, a GRB could trigger the global cooling which occurs at the end of the Ordovician period that follows an interval of relatively warm climate. Intense rapid cooling and glaciation at that time, previously identified as the probable cause of this mass extinction, may have resulted from a GRB.

We will show you what your scientists know about the God's Eye Helix and then relate this to your Earth-Ascension Process:

Excerpts from:

<http://hubblesite.org/newscenter/archive/releases/2004/32/text/>

Looks can be deceiving, especially when it comes to celestial objects like galaxies and nebulae. These objects are so far away that astronomers cannot see their three-dimensional structure. The Helix Nebula, for example, resembles a doughnut in colorful images. Earlier images of this complex object — the gaseous envelope ejected by a dying, sun-like star — did not allow astronomers to precisely interpret its structure.

Now, a team of astronomers using observations from several observatories, including NASA's Hubble Space Telescope, has established that the Helix's structure is even more perplexing. Their evidence suggests that the Helix consists of two gaseous disks nearly perpendicular to each other.

"Our new observations show that the previous model of the Helix was much too simple," O'Dell said. "About a year ago, we believed the Helix was a bagel shape, filled in the middle. Now we see that this filled bagel is just the inside of the object. A much larger disk, resembling a wide, flat ring, surrounds the filled bagel. This disk is oriented almost perpendicular to the bagel. The larger disk is brighter on one side because it is slamming into interstellar material as the entire nebula moves through space, like a boat plowing through water. The encounter compresses gas, making that region glow brighter. But we still don't understand how you get such a shape. If we could explain how this shape was created, then we could explain the late stages of the most common form of collapsing stars."

Another surprise is that the dying star has expelled material into two surrounding disks rather than the one thought previously to be present. Each disk has a north-south pole, and material is being ejected along those axes. "We did not anticipate that the Helix has at least two axes of symmetry," O'Dell said. "We thought it had only one. This two-axis model allows us to understand the complex appearance of the nebula."

THE MOST PERTINENT PART OF THE ARTICLE:

The astronomers also believe the disks formed during two separate epochs of mass loss by the dying star. The inner disk was formed about 6,600 years ago; the outer ring, about 12,000 years ago. The inner disk is expanding slightly faster than the outer disk. Why did the star expel matter at two different episodes, leaving a gap of 6,000 years? Right now, only the Helix Nebula knows the answer, the astronomers said.

What occurred approximately 6,600 years ago and 12,000 years ago? How did this major inter-stellar event impact your galaxy and your planet? Why is this important?

12,000 years ago the planet Earth's Biosphere was disrupted by a minor gamma ray burst from a nearby solar system. It disrupted Gaia's already-weakened Crystal grids of Trinity maintained in Central Atlantis and created the tidal-wave that destroyed most life and technology of Atlantean origin. We, of the Ascension Councils, created an "outer ring" of protection for Gaia to lessen this impact as we pulsated Cosmic Transmutation to your planet's heart to preserve the Wisdom of Humanity. This created the expulsion of stellar material into the first disk of the Helix Nebula. This disk is the Protective Geometry of the Loving Male Patriarchs. We have been called "the Great White Brotherhood" and we are half of the equation of healing.

About 6,600 years ago, soul-ar consciousness began to return to critical levels so that the process of moving Earth back into alignment for planetary ascension could begin again. The critical event for this Return was the second expulsion of stellar material which formed the second disk you see in the Helix Nebula. This disk is the Reemergence Geometries of the Empowered Female Matriarchs. It is moving slightly faster than the outer disk as Gender Consciousness is balancing the polarities of separation into the Unification of the Divine One. Half becomes Whole and we are All Loving and Empowered Now to complete the process of what was begun millions of years ago.

The Return of the Wheel 6,600 years ago was the critical event that placed Ascension Potential back into the Probable timelines:

The oldest wheel found in archeological excavations was discovered in what was Mesopotamia and is believed to be over fifty-five hundred years old.

The Wheel was not just a physical wheel but the restoration and rebalancing of the Human Chakra system that had been disrupted, disconnected and degenerated with the gamma ray burst event.

Origin of wheels

The wheel probably originated in ancient Sumer (modern Iraq) in the 5th millennium BC,

The English word *wheel* comes from the Proto-Indo-European **k^wek^wlo-*,^[1] which was an extended form of the root **k^wel-* meaning "to revolve, move around". This is also the root of the Greek κύκλος *kuklos*, the Sanskrit *chakra*, and Persian *charkh*, all meaning "circle" or "wheel",^[2] and also in Lithuanian, *sukti* means "to rotate". The Latin word *rota* is from the Proto-Indo-European **rotā-*, the extended o-grade form of the root **ret-* meaning "to roll, revolve".^[3]

The Helix Nebula star is the central command post, so to speak, of the Ascension Councils and the Beings assisting your planet in the shift into another dimension of consciousness. It is not a dying star, it is an active center of Spiritual Conscious Creation.

At a critical point of change 12,000 years ago, we facilitated the transmutation of the incoming gamma ray bursts in order to preserve some of the Atlantean Wisdom Teachers and the key documents they were assigned to preserve, such as the Emerald Tablets, the GenIsis Codes, the Alchemical Keys of Confluence, the Ancient of Ways and Holy of Days Calendar and so on. Their task was to preserve these documents in underground outposts around the Earth so that the Ascension process could begin again when conditions were more favorable. You know of some of these places: under the Sphinx, in the Master's Retreat in the Grand Tetons, and Shamballah in the Himalayas.

Approximately 6,600 years ago, we opened the Chambers of Wisdom for those LightWorkers to re-emerge and begin to assist in the process of the Universal Law of Accelerating returns. Accelerating return is activated by a conscious decision to channel energy.

**This is what we are asking you to Do:
to become a Living Channel of Love.**

More accurately, to channel energy is:

To direct or guide along some desired course

Our desired course is Ascension for All Beings.

Our teaching is Based on the Law of Confluence, moving through the channel:

[channel](#) 

c.1300, "bed of running water," from O.Fr. *chanel*, from L. *canalis*
"groove, channel, waterpipe"

The Law of Confluence is the Universal Truth that all things are moving
back to the Center of One, in a weaving pattern of Light,
through the Limitless Power of Love.

All beings benefit from this. Abundance for All is the Reality.

What is the significant event exactly 6,720 years ago? We, the Ascension Councils of Humanity, the Loving Patriarchs and Empowered Matriarchs, reset the Universal Clock for Humanity's Ascension.

This was deemed to be the beginning of the Julian Epoch:

In [astronomy](#), an **epoch** is a moment in time for which the position or the [orbital elements](#) of a celestial body are specified. The position at other times can be computed by taking into account [proper motion](#) or [orbital motion](#). In the case of orbital elements for a solar system body, these change due to perturbation by other bodies on our solar system.

The **Julian day** or **Julian day number (JDN)** is the integer number of [days](#) that have elapsed since the initial [epoch](#) defined as [noon Universal Time \(UT\) Monday, January 1, 4713 BC](#) in the [proleptic Julian calendar](#)^[1]. That noon-to-noon day is counted as Julian day 0. Negative values can also be used, although those predate all [recorded history](#).

Now at 18:36, Friday [November 9, 2007 \(UTC\)](#) the JDN is 2,454,414.

Between now and the end of the Mayan Calendar, transported safely out of Atlantis before the Fall, there remains, 1,868 days.

We are approaching the nano-second of the Great Ascension of Humanity. We call on you today, 11-9; 9-11 to assist in the transmutation of another potential gamma ray burst into your biosphere.

There are many similarities in your world today and the world of Atlantis 12,000 years ago. We have spoken before about this Reality; in Atlantis, there were leaders in power who were focused on personal gain and greed. There was technology run amok without heart; education based on the separation of mind and soul; science based on genetic manipulation rather than Love; government based on control rather than Truth; religion based on power rather than Unification into the One True moving energy behind all things: Love. The reigning belief among most Atlanteans was the Law of Attraction and the underlying principle that the Universe is Mental.

We have been teaching that the Truth is that the Universe is Heart. We have been suggesting that the Law of Confluence is the dynamic that will heal the discord you see in the world today, on a global level of Abundance for All, rather than affluence for a few.

In Atlantis, there were a few who knew that the environment had become unstable and were working very hard to get the attention of those in power. There were a few people, the true Spiritual Leaders, who knew that there was instability in the Crystal Grids of Trinity. This instability at the core of Earth was what created the cataclysmic outcome when the additional stressor the Gamma Ray Bursts impacted the planet.

Not enough people stepped up to transmute the energies of corruption into the regenerative power of healing. Not enough Lightworkers believed in their power to transmute Gamma Ray Bursts into Living, Loving Light. Atlantis fell. This was not a mistake. It was Divine Right Order. A Purification was necessary to restore Balance and Order to the planet. A purification took place. For nearly 6,000 years, the biosphere

healed and regenerated, above-ground intelligence was slowly restored. The waters and air cleared. Life began to expand and flourish again.

In conclusion, you all have the capacity to assist in the Transmutation process. We cannot do this without a critical mass consciousness of Incarnated Light workers. This is the Law of As Above, So Below. You are called to assist the Ascension Councils, by your asking, by your intention and by your love.

To assist in this process we ask you to participate in this experience Now:

Open your heart to Love. Know that in all of your incarnations, you have loved far, far more than you have ever suffered. Feel the Truth of this. Know that you are returning to the Source, purified and whole, in loving consciousness of the One.

Center yourself now in the heart of your home, which is Gaia, the ensouled planetary being and ask:

For the greatest good of Planetary and Human Ascension, we ask for the transmutation of gamma ray bursts into Living, Loving Light.

We give thanks for the transmutation of gamma ray bursts into Living, Loving Light

We ask for Loving Light to encircle the planet for the remainder of these 1,868 days and beyond as we move into the time of ascension and acceleration in grace and ease.

We give thanks for this encirclement of Loving Light around the planet and our hearts for the remainder of these 1,868 days and beyond as we move into the time of ascension and acceleration in grace and ease.

We are Wisdom Teachers, Way Showers and Healers of Humanity. We are Blessed by the Divine.

From the center of the God's Eye Helix, we thank you for your willingness to Serve and to answer the call. Know that you are a Living Channels of Love. Know that indeed, you are Blessed by the Divine and you are One with the Divine.

We close in saying, Adonai, Adonai, Adonai, Tseboyeth, as the Plan on Earth moves forward into the Eye of God.

Submitted to you on this day of 11-9: 9-11, by Lord Melchizedek and the Ascension Councils.

© Ronna Prince 2007
