

12-21-2007

We welcome you on the Winter Solstice of 2007, occurring in the evening hours of 12-21 and 12-22, 2007. This is a day of celebrating and honoring the longest darkness before dawn. Speaking on the topic of transition, attunement and grace is the I AM Presence of Kuthumi.

There are 11 days remaining in the year of 2007. 11 days in which to reflect on the passing year and to create a vision and intention for the coming year of 2008. 11 in sacred numerology is a choice point signifying the collapse back to duality ( $1+1=2$ ) or the expansion into the inner sanctum of your own soul, the pillars of 11 of the I AM Temple

During this time of transition between shortest light and longest dark, perhaps you will choose to attune your life purpose to the manifestation of grace in incarnate form. This attunement requires vision, intention, and action. Many of you believe that grace is a state of being which occurs effortlessly and without specific intention. We suggest on this day of 12-21, that grace is a state of attunement to the Divine within you, which necessitates great consciousness, choice and action.

You are completing a year of duality **and** a deeper shift into spiritual consciousness. We see that by the leading energies of the year 2007, a “9” year of completion. 1-1-2007, was the leading energy of 11, ( $1+1+2+7=11$ ) and 2. The first day of the year impacts the tone and tenor of the entire year. This drives a deep inner awareness of opportunities on New Year’s Day which leads to the cultural predilection of New Year’s Resolutions.

You have all experienced many transitions and endings in 2007. Many of you have made profound choices in the year of 2007 to move into greater alignment with your own inner truths, even in the face of disapproval from those around you. For many of you, the deepening spiritualization of your life led you to inner conflicts that were mirrored by your outer reality for the soul-driven purpose of making a choice to transition to something new. Many returned to the fear-based reality of the known and socially acceptable path of conformity. Many moved ahead on the path of initiation into creating a new world order, which begins within the individual soul!

In 2008, the leading energy is Trinity, as seen by the numerology of 1-1-2008: 12/3 or 1-1-1.

*(Image from Open Source Order of the Golden Dawn)*

(The 3 Hebrew letters represent the fire encodings of trinity: Shin-Aleph-Mem, or Mother (Aima) –Father (Abba)-Wisdom )

2008 is a year of Integration of Trinities. It is the acceptance of all of who you are: light-dark, male-female, spiritual-physical, emotional-mental, self-oriented-soul-driven; human-divine and then, the *merging of these into an attunement of your life path to living in a state of grace*. We show you this correlation from the trinity word of Integration:

The numerology<sup>1</sup> of the word **integration** shows us the Lovers of Tarot (6) and the Balance which occurs when the inner and outer worlds align:

### <sup>1</sup> Pythagorean Numerology System

The Pythagorean conversion chart is featured directly below. Easy to use and understand, it incorporates the numbers one to nine in its conversion system.

1	2	3	4	5	6	7	8	9
A	B	C	D	E	F	G	H	I
J	K	L	M	N	O	P	Q	R
S	T	U	V	W	X	Y	Z	

**i n t e g r a t i o n**

9 5 2 5 7 9 1 2 9 6 5

	<u>Total</u>	-	<u>Reduction</u>
<b>Total Letter Value</b>	<b>60</b>		<b>6</b>
<b>Vowels =the inner path</b>	<b>30</b>		<b>3</b>
<b>Consonants =the outer path</b>	<b>30</b>		<b>3</b>

Perfect balance within the “6” creates the sacred geometry of the star tetrahedron, seen on the middle pillar. The star tetrahedron is the energy field around your physical body which allows you to access the feeling of Divine Presence within and without, an integration of all of who you are. The activation of the star tetrahedron, or Merkaba, provides you with a portal to expanded consciousness, beyond the 3<sup>rd</sup>/4<sup>th</sup> dimension into an integrated, spiritualized life upon planet earth. In the following link, you are able to see and feel the three spin motions of the star tetrahedron/Merkaba.

<http://www.geometrycode.com/sg/rotetra.shtml>

Merkaba meditations and activations are very powerful tools of consciousness and are widely available for your “in-structuring” which is why we do not repeat them here. We simply mention them as a method by which you may align your inner and outer realities into the Integration of Trinities.

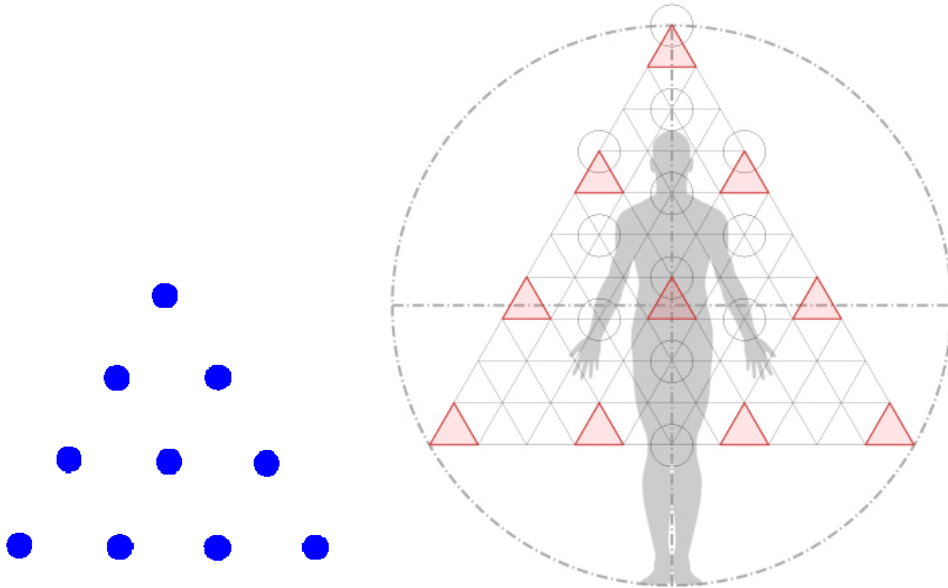

In these final 11 days of 2007, you have the opportunity to create your vision for the New Now, your personal Mission Statement for 2008. This is not a resolution, but an attunement of your consciousness to what you intend to create in the New Year of 2008, a 10/1 year of New Beginnings. A year of activating the inner Magi, or the Magician of Alchemical Transmutation. We suggest that you resist the pull to “re-solve” the same issues in your life from the same platform of consciousness as you have used, to a limited degree of success, in previous years. Resolution is a backward looking energy, while attunement is a movement forward into the One Source of All.

Attunement is the process of consciously aligning yourself with the vibrations of the Maestro of Creation. The Maestro of Creation in your life is you, and the Divine Creator spark within each one of you.

We give to you a different tool that is perhaps unfamiliar to you in this life. It is a comprehensive tool that you may use to create a vision for 2008 from an integrative platform of consciousness. This tool is the sacred and transformative tool of the Pythagorean Tetractys. The Pythagorean Tetractys is a system of 10 principals which

create a higher degree of attunement consciousness, whereby, a person is divinely guided to use All Elements of Creation in a New Now.

The symbol of the Tetractys is a sacred triangle of 10 points:

This is the activating geometry of the Logos, or manifestation of God on Earth. (*The image on the right is the male form of the tetractys: the female form is an inverted triangle, with the point facing downward.*)

On each point of the tetractys, is a tool of consciousness that will allow you to create from a vision of integrated balance, a state of attunement to Grace.

Grace, in Christian theology, is a concept of receiving a sanctification by God, of obtaining God's favor by living a sanctified and holy life. In Greek mythology, Grace was one of the three sisters who were the givers of beauty and charm. In modern usage, it has become associated with elegance and beauty of movement or expression. For those of you who practice spiritual awareness, grace is the giving of thanks before a meal, in recognition and gratitude to all those who have participated in the bounty of that which you are about to take into your body. The root origin of the word grace comes from the Latin *gratia* "pleasing quality, good will, gratitude" as well of Sanskrit *grnati* "sings, praises, announces".

The root origin tells us much about the original concept and creation of grace: it is to announce our intention as incarnate souls, to attune to a state of balanced living, where our inner and outer worlds are in harmony and we experience and express gratitude and love for ourselves and all beings.

Each point of the tetractys gives you an opportunity to create the attunement to Grace:

The tetractys symbolizes many levels of reality: the 4 elements, the harmony of the spheres and the cosmos, an integration into a higher order and the multi-dimensional organization of space, to name a few.

In positions 1-10, with #1 being the single point at the top of the triangle, 2 and 3 in the second row, 4, 5, and 6 in the third row and 7,8,9,10 in the fourth row. In the intention of creating a New Now for the year of 2008, center in the consciousness of all of who you are and using whatever method you are drawn to (tarot, runes, archetypes, words, sacred geometry, or aspects of your life such as work, family, community etc..) create a tetractys of attunement:

Position #1: represents the Premise and the Foundation for your New Now. IT forms the cornerstone for integrating all other positions.

Positions #2 and #3 in the second row represents the Divine and the mundane and the relationship between the two.

Position #2 on the right, is the Light position and represents the influence of the Divine or your soul which leads you, the individual, to take action in the world.

Position #3 on the left, is the Dark position and represents the action you take in response to the calling of the Divine/soul in your life.

The third row represents three decisions you must make.

Position #4, the Creator position is rightmost, representing new decisions and directions that may be made.

Position #5, the Sustainer position is in the middle, representing decisions to keep balance, and things that should not change.

Position #6, the Destroyer position, is leftmost, representing old decisions and directions that should not be continued.

The fourth row of four points represents the four elements or tools at your disposal in the creation of your vision.

Position #7, is the Fire position, at the far right. It represents the dynamic creative force, your vision and the activation of personal will.

Position #8, the Air position, is to the right middle, representing the mind, thoughts, and strategies towards the realization of your vision.

Position #9, the Water position on the left middle, represents your emotions and feelings about your vision and also tells you where blocks to manifestation may arise.

Position #10, the Earth at the far left represents the physical world you live in on a day to day basis where you experience the operative level of your consciousness in incarnate form. Position 10 tells you how you may integrate all aspects of your life and bring them into alignment with your vision, connected back to the #1, Foundation of your New Now.

This is a tool for conscious creation. How deeply you delve into it and explore the inner and outer worlds is of course, your choice and your decision. The tetractys was formerly shrouded in the Pythagorean Mystery school as one of the greatest secrets on for the Initiated few. I speak of this as the former Master Pythagoras in order that you may more clearly understand the power of this tool in Creation and Manifestation of Vision.

The time of secrecy and initiation by “outer Masters” is over. You now initiate yourselves. We suggest that anyone offering to initiate you, is reflecting the consciousness of the old ways of master-student. You are your own master and you must take up the mantle of your inner mastery in this New Year of Integration of Trinities if you choose to change your reality in attunement with grace.

The upswelling of critical mass consciousness since Harmonic Convergence has made it possible to unveil these tools of creation to All who are willing to be fully responsible for their incarnate lives. In the time of Pythagoras, the mass of humanity was not deemed to be responsible enough for Right Action to have these sacred tools of creation at their disposal. This time has come to an end.

The tetractys creates through consciousness. In times of transition, such as the final days of the year of 9, moving to a year of 1, and the leading energy of the 1-1 of the New Year shifting from duality (2) to trinity (3), this tool has the potential to attune you to a higher state of Grace. Grace through your intention, your vision and then, your commitment to action.

On 1-1-2008, you move again into an 11 day process of deepening into your vision and consciously creating the impetus for the New Year of 1. From 1-1-2008 (1-1-1) to 1-11-2008 (1-11-1) you more fully experience the creation powers of your vision-intention-action. 1111 is the structure (4) of your new reality.

The last 11 days of 2007 and the first 11 days of 2008 provide you with a unique opportunity to create your vision from a new platform of consciousness, attuning, aligning and integrating to the New Now. As you wake up each morning, review and refine your tetractys of attunement. As you go to sleep each evening, ask for guidance and dreams on the unfoldment of your vision. During your waking hours, stay open to the signs on your path, for they will be there, and be prepared for miracles to occur in the New Year of 1.

As the day of longest darkness expands to the day of longest light six months from now (6-20-2008), you may take note of the greater grace that is filling your life and fulfilling your light body with Love. This occurs through conscious creation, an awareness of the opportunities you have before you in the New Year of Integration of the Trinities. In this

New Now, you decide, you choose, you create and you initiate your path to transition, attunement and grace.

The Prayer of Grace from the Lord Kuthumi is as follows:

I open my soul to the inpouring of grace  
I open my heart to the outflowing of Love  
I open my eyes to the Beauty of All that surrounds me  
I open my ears to the Sound of Heaven on Earth  
I open my hands to serve others in Love  
I open my home to those who need companionship  
I open my Life Path to Integration and Harmony.  
I am greeting my New Now, I am grateful,  
I am grace.

Blessings from Kuthumi for a peaceful holiday and a prosperous New Year
