

4-13-05 Group

Please address the group on the topic that serves our greatest good and the greatest good of humanity at this time. We are all seeking balance in this time of change, through means and modalities which are honoring, expansive, deepening and strengthening. What is it as a group that we need to clear in order to take the next steps on our collective spiritual journeys?

WE welcome you and we will first of say that this question is a most propitious one at this time. *This is a very important question, one that all of humanity would be best served by if they were only to ask it. And since not all access the hierarchy of the ascended masters or even their own guides, who may they ask this question of then? To ask this question at any level is of use and purpose. If one is not aware of the inner realms or even of any guides or angels, one may simply ask to be in right relationship. This invokes the powers of insight, clarity and consciousness, through free will and allows the inner realms to aid and assist. Imagine a time when once again important decisions impacting all of humanity will be directed by leaders aligning themselves with higher purpose, with the guides of light and with the Divine Plan. Do you not see the great possibility of healing the environment when the leaders would ask the question of "what is the solution for the greatest good of all?" Not for the greatest good of those in power, or of special interests or of a short-term nature. For what is the greatest good of all for example with respect to the rainforests? For some of this is coming to pass and when the turning point is made, the resonance with higher spiritual purpose will shift to the greatest good as a moving force. The rainforests are beginning to be respected and to be seen as a precious gift. There is the movement to stop the useless devastation of the forests and to enter into right relationship with the gifts offered by the rainforest. There are many medicinal healing plants and substances that the rainforests gladly gift to humanity, and many of those will be "found" and "discovered" when this right relationship is entered into. Much good would come of a simple prayer of awareness and gratitude for the role and relationship with this beautiful entity which graces the earth. Yes indeed.*

We enter in joy (en-joy) into this question for it is indeed a collective question and you are all indeed on a collective spiritual journey. This question has the possibility to take you deeper into your spiritual psyche (an oxymoron to be sure!) and into the collective consciousness of all of humanity. For we have been speaking to you about the transitional time of moving from the Piscean to the Aquarian Age. We have spoken to you about the energy of humanity moving from victimhood to responsibility. And we have spoken about the need to invoke all of this in balance, clarity, integrity and the deepening energy of wisdom. For what great good is served if you blunder your way into the era of all-possibility, unconsciously acting and reacting out of lower energies or out of karmic stories still holding you to a particular spoke on the wheel of incarnation? We will tell you that for some, a great good is indeed served to remain on this path if that is what is needed for your soul development, and there is no thing wrong with this. However, it does not necessarily serve the greater good of humanity as you asked, for those of you

Page 1

who have the ability to heighten your consciousness on the journey in order to step off of the incarnational cycle of action and reaction.

*You have asked us before if it is indeed the case that at the Harmonic Convergence, humanity received dispensation for karmic acts. This is a simple and yet complex concept, one that in your 3D basis of reality is difficult to grasp. For indeed there was a dispensation made available through many levels and layers of the realms of spirit, but this did not free humanity from responsibility and from the primary task of consciousness and choice. The word dispensation is not understood by you at this time. IT is not about forgiveness or letting humanity off the hook, so to speak. It is only possible at the turning points of Ages, from Pisces to Aquarius. It is an alignment with God's Plan that allows those who seek, to see, hear and integrate into wisdom their own soul's hi-story for the purpose of contributing to the greater good. It is of no great good that most of humanity remain stuck on the wheel of karma, so to speak. Thus, in order to allow the opportunity for the wheel to be cycled off of, to be halted for that one moment of clarity, and to be spiraled out of, one must take up the task of seeking in Right Intention, Right Word, Right Thought and Right Action. Only in this way, may one take advantage of the great dispensation of Karmic Release. Do you understand? We are not able to interfere with your free will choice. This has never changed and is not and was not part of the dispensation. So imagine all those who were, by free will choice, not in a position to take the great gift offered at Harmonic Convergence. They continue on the wheel and cycle of karma, going on and on in a largely unconscious state of living life through action and reaction, without the opportunity to consciously heal and clear karma. If on the other hand, one was conscious and seeking in 1987 and in seven year cycles thereafter, one had the opportunity to take this great gift to have the Potential and Possibility to cycle off the wheel. This simply means that one has the opportunity to use that which is available, still through your own exercise of free will choice, to address all issues of karma so that you make a new reality for yourself. So then, you draw to yourself all the situations and people you need to complete karmic cycles of many millennia, of many issues you have struggled with throughout cycles of time, and, at the very root, all of your experience on Earth as part of the beautiful experience of humanity. Yes indeed, most perfected in Divine Plan.*

Now, there is such a thing as a soul group karmic release. As a group, you have been coming together for approximately nine months. Does the time period of nine months have significance for humanity? Yes indeed, for as you all know, nine months is the gestational period for humanity of creating new forms. It is the time period, within the three dimensional world required to gestate new forms of thought which will then manifest into reality. We will also tell you that as you enter into the fifth dimensional reality, this constraint will no longer be operational. In the fifth dimensional reality, when creating new options of a spiritual, mental or even physical nature (other than actual new life creation), you will not be and many of you are not now, held to such a time constraint. This is the realm and reality of responsibility.

During the time that you have been meeting, either in person, or through the means of these discourses, you have all been consciously attuning yourselves to a wave thought-

form of group creation. And what have you been addressing our dear ones? Not only the topic of balance, but of many things of necessity for the greater good. That of sacred geometry (the ankh, star tetrahedron, pyramids, equal armed cross etc.), that of grounding and mutual gifting into your planetary purpose of shifting to new realities, that of healing the heart, that of clearing the emotional body and the aura, that of deepening wisdom, and above all, that of connecting to the Unity Consciousness. What has been holding many of you back from the deepening and actual experience of these aspects of spirit is the group soul block that prevents you from refining your consciousness to the level of attunement with One.

This is the soul group karmic release we offer to you now, if you so choose, out of the exercise of your own free will, to accept it. As a group, you have experienced a key pivotal lifetime together when you participated in a society which valued the individual over the group, to an extreme. There was much competition and strife, outwardly approved of and encouraged in order to have the strongest of mind, body and soul-endurance, take leadership and enforce the code of conduct. Many were harmed in this process and devalued in this group experience. This was the Piscean theme of might makes right operating through your soul-family experience of living in a spiritual community where the operational energies were strength, commitment, will and drive. This was a valuable lesson for you all, for you all agreed to take on the dynamics of the society and co-create it together. But now is the time to release the resonance of that lifetime and to end all vows you made as a group to rebalance the energies so that karma could be cleared. IT is no longer necessary to replay the roles and to experience the return of karma through this story.

We now gift to you, through the karmic boards and your own guides and counsels, dispensation from the need to re-play and re-act to this group drama. This soul story was developed with very high principles at work, that of establishing positive creation of reality on the theme of strength and commitment. But inherently in this process, was the separation from the Source, the inability to access the Unity Consciousness for this society was created out of competition and ranking, not out of Love. You now have the ability to release this pivotal lifetime as group karmic soul clearing, and ask, before your own guides and karmic counsels, to clear all vows, belief systems and cellular memories causing resonance into the Now. If you so choose, you may work through an active meditation to clear these energies, using the aid and assistance of all entities of Light (and there are many helpers available) for the greatest good of your own soul, your soul group and of humanity. We believe that those of you wishing to participate in this experience need no further guidance, for you are all One and know in your soul, that which you need. Please know at this time, that the karmic board led by Lady Pallas Athena has cleared this vibration at the group karmic level and now, you may take the clearing deeper into your own soul's hi-story. Know that this is coming to consciousness as part of the Aquarian Age of Responsibility and the turn of the True 8-fold path.

To answer the curiosity some of you are experiencing about this past story, we will simply tell you that the details and timing are not of great importance. What is of significance is to know that this energy has extended into your own spiritual groups

where you work in the deepening energies of the Unity Consciousness. Many of the dynamics of these groups have been impacted by the karmic lessons of that time. So when you examine the inter-personal dynamics between the leaders and the participants of your own groups and your own spiritual callings, you will see that there has been a current of separatism and of status. When you bring these issues to your conscious minds, our dear hearts, you are then able to accept the clearing of all of these issues and the replacement of the energies of separation with the energies and motivating force of Love. For as you know, true Love knows no separation from the Source, for it comes from the Source and is perfect in its vibration as the moving element of creation. We thus, invite you to take the hands of your own guides and bring the clearing into all levels of the bodies and the group energy body that you so wish.

When you have experienced this clearing and replacement with Love, you may wish to make note of your experience, and then to experience the vibration you feel in your groups. You may notice a higher, and more unified sense of the group energy of clarity and Light. For this is a great and divine energy moving through you and the groups in which you Serve, to create Responsibility for the next steps on your common journey into the Aquarian Age.

One final thing we would like to share about the Aquarian Age is the important element of Consciousness. It is one of the defining aspects of this age to accept your roles and your creations, in impeccable consciousness. Let us contrast that previous group lifetime of the competitive, separative mode of acting with the mode you are now working through, of cooperative, honoring and egalitarian respect. It is no longer a useful modality to remain in an unconscious state of your spiritual work and purpose. This does not serve humanity at this time, and this is why the initial question of becoming conscious in order to clear all pathways of unconscious systems, is a critical one at this time. To remain unconscious of belief systems, vows made in great energy and emotion during or between lifetimes, bonds and karmic cords made to complete the karmic interchange and resonant cellular memories, no longer serves your greatest good.

As part of the 144,000 year Plan and the Plan that exceeds time definitions, this transition to responsibility requires first and foremost, Consciousness, and then, of course the commitment to Love and to operate for the greatest good of all. These things are the healing keys and the transitional keys to ascendance for all of humanity at this time. This is not a mental exercise our dear ones. For some of you would wish to believe that this process is one created in the mind. It simply is not of the mind, it is of the Divine Mind, the Creative Life Physical Body, and the ascension of the Emotional Body into the Unity Consciousness that this energy moves into. You are part of the All, and the All, all in one moment in time. You are now able to hold duality as the illusion and the pathway to learning, and experience, in the same moment, that you experience the One. You are able, if you so choose, to see the stories as the teachers, and the moving energy behind them as the trinity of Love, Power and Wisdom. These things you may do in remembrance of the great teachers, of Buddha, Christ, Sai Baba and many others. For their consciousness is interwoven into the tapestry of humanity which now, from the grace and dispensation of the Aquarian Age, moves from the illusion of a tangled web of

thread, to the reality of perfection existing in the true tapestry of All experience, All energy and All Light.

For the greatest good of all concerned,

In Light and Love,

Kuthumi, Lady Pallas Athena, and the many karmic councils, boards and angelic hosts
